BUILT WITH INTENTION

Jim Wulf Family

Another year has come and gone, and we are thankful for each and everyone of you that have shown interest in our program and entrusted us with the genetic improvement of your herd. It has been our family's intention for 3 generations to build cattle that move the beef industry forward, adding profit for every segment, because if one does not survive the whole system suffers. Over the past few years, it has become more evident to me the need for specialized genetics for different scenarios, i.e. maternal and terminal lines. The results of this thought process really showed up in this year's bull offering. If you run a terminal program where you buy your replacement females, the big frame ATM bulls will sire calves that crush the scales at weaning and finish with massive end weights. There are also bulls, and many of the bred heifers that are extremely maternal in their makeup, keeping cow efficiency and fertility at the forefront. I often wrestle with myself because to some extent, there is a lack of consistency in our herd, but when the buyers come to the sale and put together a set for themselves of like type and kind that fit perfectly with their goals, I am reminded that the goal is consistency of YOUR calves. If you ever would like to reach out and discuss what your intentions are when building your program, don't hesitate to give me a call!

We invite you to join us in Starbuck on February 13th for the 2026 Bred for Balance sale! Be sure to follow myself, Travis Wulf, on Facebook to stay up to date on all things Bred for Balance and check out our website for a full data sheet, videos and to join our Bull Chat on Feb 9th. We look forward to visiting with you about this year's sale offering over the next few weeks!

THREE-YEAR BREEDING SOUNDNESS WARRANTY

We strive to continuously improve on the development of our bulls and are confident in their longevity. So much so that we offer a three-year breeding soundness exam warranty on all bulls purchased through the Bred for Balance sale. If for any reason other than an "act of God" your bull is not able to service cows, you will receive a credit back towards the next Bred for Balance sale.

- Before the bull's first breeding season, 100% of the purchase price less a \$2,000 salvage value
- Before the bull's second breeding season, 2/3 of the purchase price less a \$2,500 salvage value
- Before the bull's third breeding season, 1/3 of the purchase price less a \$3,000 salvage value

The 2026 Bred for Balance Sale is just around the corner. Once again, the offering is stacked with the genetic horsepower that will push the beef industry ahead. The 132 herd sire prospects in the sale live up to the name Bred for Balance. Multi-trait excellence is displayed from cover to cover, whether you want to raise the bar for terminal traits or are in search of lower input and more maternal genetics; the bull you're looking for can be found in Starbuck, MN.

The markets in the beef business are off to a strong start in 2026. The early January feeder cattle sales have seen strong support and near record prices. Low cow inventory and continued strong demand point to the fact that 2026 is promising to be another record year! The value of superior genetics has never been greater. The classic slogan that "Pounds Pay" holds true in our current market. However, reducing costs with sensible mature size, females that last longer, and efficiency to cope with high input costs allow producers to find more profit. The Bred for Balance bulls are **Built With Intention** to provide both market-topping output while keeping costs in check.

We hope you can make plans to join us on February 13th in Starbuck, MN. The value and phenotype of the cattle have allowed these programs to be the genetic source for many fellow breeders and elite commercial cattlemen. The Bred for Balance program is also built on providing customers with unrivaled service. A strong warranty, affordable delivery, and feeder cattle marketing options are the foundations of their service and commitment to their customers. If you have any questions regarding the offering, please do not hesitate to reach out to any of us.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

- \$10,000 – \$25 delivery discount per head
- \$20,000 – \$50 delivery discount per head
- \$30,000 – \$100 delivery discount per head

- \$50,000 – Free Delivery

Cost share delivery options

DELIVERY AND BOARD

- We are more than happy to deliver your purchases and will do so for a guaranteed delivery fee based on your state. Any additional cost incurred above and beyond the guaranteed rate will be covered by Bred for Balance. We will do our best to get the cattle as close to your farm as possible. If you so choose, bulls will be boarded free of charge, semen checked and then delivered.
- We ask that females are either picked up sale day or delivered within the week following the sale.
- Further delivery details are listed on Page 3.

HERD HEALTH

We engage in an aggressive Johnes testing protocol. A comprehensive vaccination program for clostridial, respiratory, and reproductive diseases as well as strategic treatment for external and internal parasites is conducted. Please consult the owners or the veterinary team for more information about the supervised programs. Health papers will be available for shipment within the United States and Canada upon completion of any required testing.

GENETIC DEFECTS

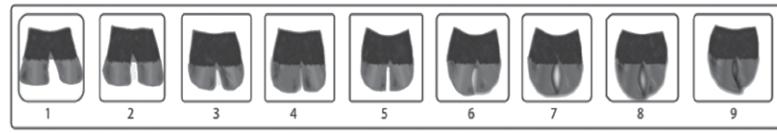

All animals selling are free of Arthrogryposis Multiplex (AM), Developmental Duplication(DD), Neuropathic Hydrocephalus (NH) and Contractural Arachnodactyl (CA) unless otherwise noted in the footnotes.

Under \$20,000 purchase price	\$20,000 to \$39,999 purchase price	Over \$40,000 purchase price
RETAINING 50% Semen Interest	RETAINING 33.33% Semen Interest	RETAINING 25% Semen Interest

The American Simmental Association is actively collecting hoof score data to ensure Simmental cattle keep the quality hoof they are known for. We score every bull to better give you an idea of how their hoof is shaped and any bull that is out of bounds is culled. Each bull's hoof score is listed in their lot box with the first number being the CLAW score and second being the FOOT ANGLE score. It is important to match the right hoof with the right environment and we hope these scores can help you do that.

Claw Shape

Reference: Shape (primarily curl) and evenness of the claw set.

DOCILITY SCORES

- 1 - Calm: Content with human interaction
- 2 - Okay: Moves away as a person approaches
- 3 - Discontent: Good for big range country
- 4 - Nervous: Culled
- 5 - Aggressive: Culled

Foot Angle

Reference: Strength of pastern, depth of heel and length of foot.

BUILT WITH INTENTION

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

When searching the country for a fault free, well-balanced bull, it will be hard to find one better than New Balance! His EPDs speak for themselves and physically, he is a proud and stylish bull with superb structural correctness. His dam is a picturesque cow who also raised a high seller last year that went to Blake McDonald in MO.

Nonchalant stems from a cow family with incredible fertility. His dam and her flush sisters have never missed AI! He is deep in his rib with an excellent hip and could easily be used on heifers. Great bull to keep females from as well, as udder quality runs deep in his pedigree.

Talk to Brady about all your forage and cover crop seed needs! We are a dealer for Millborn Seeds and now have 10+ years of experience building soil health. 320-424-2989

New Moon keeps this string of Purebred ATM bulls going and leads off a great set of Covenants. He is well balanced in his design with extra rib and volume, a great design to his hip and hind leg and a level top. His added growth and carcass quality bode well for profitable feeder calves.

Another big growth, ATM bull with added frame and carcass. This bull did go off feed in December which set him back some in his development, but he is starting to come back around. His genetics for added pounds did not change though!

On the hoof, this Summit son is quite special! His cocky head and neck ties into a level spine that is thick and long. His hip and hind leg are of the ideal angle, and his center rib is expansive. He is a powerful, fault free type of bull.

BULL DEVELOPMENT

Bulls are weaned the middle of August, then run on a 40-acre pasture as late as weather allows before moving into the monoslope.

They are developed on a ration consisting of grass and alfalfa hay, silage, earlage and a protein supplement. The ration is built to be high protein and low fat to build muscular bulls that hold up once delivered. As the bulls age, we continue to lower the energy, it is our goal to have them on a diet similar to a normal cow ration at the time of delivery.

Nominator received the excellent calving ease and maternal traits of his dam to go along with Homelander's tremendous marbling. He is a big middled bull with a dense muscle pattern and outstanding mating flexibility.

Through our partnership with Allied Feeding, we are always looking for good loads of feeder cattle to invest in! Be sure and reach out to Travis before you sell your calves, we can talk about marketing options and logistics of getting them into an Allied program.

Bred to SCHOOLEY LAZARUS 430L (4256894). Estimated calving date 4/15/2026.

Journee is a beautiful Galileo cow whose bull calf sells as lot 79. She brings to the table all the traits that factor heavily into API and is poised to excel when mated to a power bull like Lazarus. Her level top and great hip design are a crucial part of what makes a cow last.

This heifer's balanced EPD profile speaks to her mating flexibility and overall fault free makeup. "Sometimes the greatest cows are the ones you never expect to be", great advice Mr Tom Hook gave me one time when buying a set of open females.

The Kodiak x Demi sisters have caused quite the stir! Great muscle, high capacity and sound made has been right on par with these girls and 514N fits right in. She comes with a phenomenal disposition as well.

The Fabulous Five

Our commitment to offering our very best rings true again in 2026! These heifers are hard to sell but we love seeing them go out into the country and make an impact for their new owners. Selecting which females will make this distinguished group starts as soon as the grass turns green, and a couple of them we knew right away! Build your herd with INTENTION by investing in females that combine phenotype and genotype at the highest level.

New Girl has been an obvious choice for the Fab 5 since early on. Her jet front, paired with her expansive rib cage, added muscle dimension and superb structure makes her a unique breeding piece. Her extremely balanced, fault-free set of EPDs speak for themselves and make her a great candidate for the new P&G show at Jr Nationals.

Cattle that push genomics to the level of Nova are hard to let go and even harder to find for sale. One of the standout calves of CLRS Lincoln 0107L's first calf crop, she has a strong balance of traits that are especially unique to purebred Simmental cattle. Her elite calving ease, marbling, docility, and stayability, coupled with a balance of other traits, will give her new owner a big edge when creating the next generation of productive cattle.
